

# OUTPATIENT PHARMACY TECHNOLOGY, BASIC CERTIFICATE

College(s): MX

Program Code: 0420

Pharmacy technicians assist and support licensed pharmacists in providing health care and medications to patients. They may perform many of the same duties as pharmacists, but all technicians' work must be checked by a pharmacist before medication is dispensed. While pharmacy technicians can work everywhere pharmacists work, some state laws may limit the duties they perform.

The Outpatient Basic Certificate prepares students to work in community/retail settings, outpatient hospital settings, and any other pharmacy setting similar to the outpatient. If the student wishes to continue on, they can also earn an Advanced Certificate. A special application is required for entry into the program.

*This selective admissions program requires students to submit a separate application or to take additional action before enrolling.*
